

Credit Name:CSE 2120 Data Structures 1

Assignment Name: EvensAndOdds.java

Error Log Entry

What error message did you encounter (if any)?

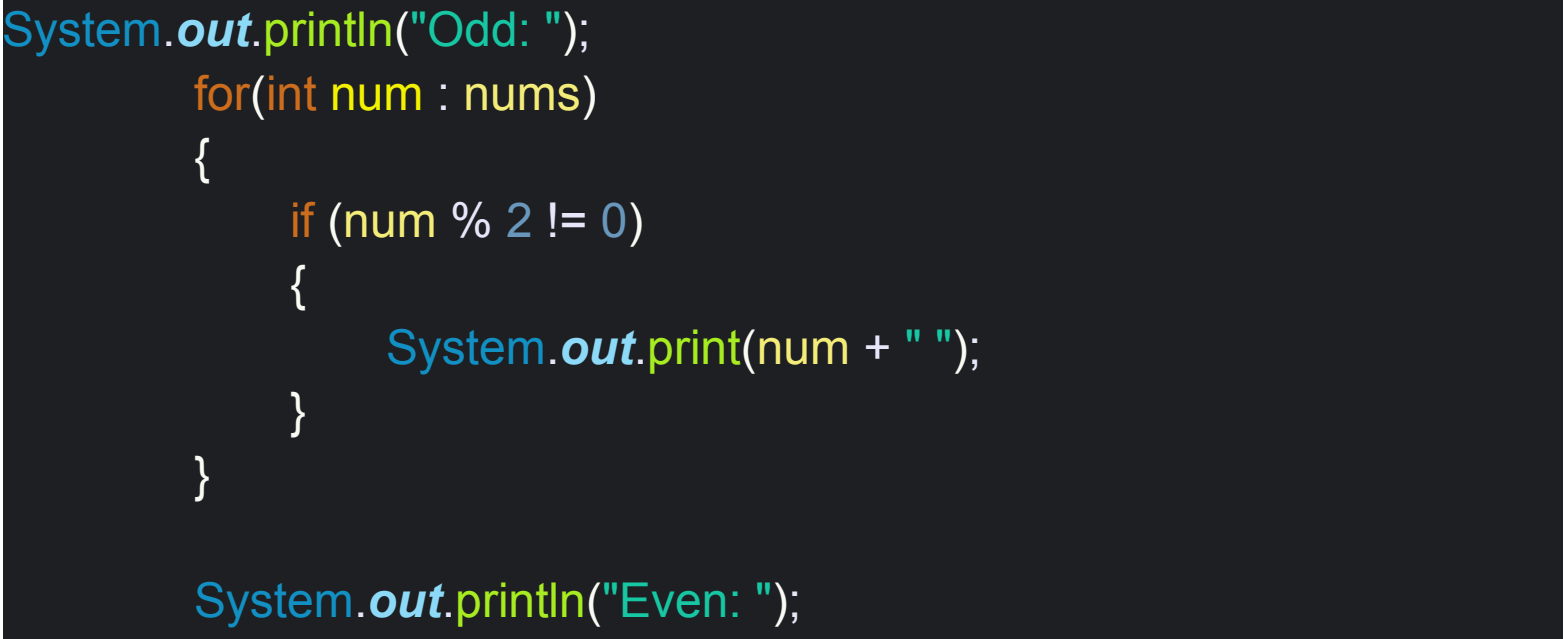

What unexpected behavior did your program exhibit?

There wasn't a line break between Odd and Even, the even and odd numbers were on the same line.

What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.)

I didn't put a \n in front of the Even

Include a screenshot of specific lines of code.

```
System.out.println("Odd: ");
    for(int num : nums)
    {
        if (num % 2 != 0)
        {
            System.out.print(num + " ");
        }
    }

    System.out.println("Even: ");
```

How did you fix the issue?

I added a \n in front of the Even

Provide the corrected code or solution using a screenshot.

```
System.out.println("Odd: ");  
    for(int num : nums)  
    {  
        if (num % 2 != 0)  
        {  
            System.out.print(num + " ");  
        }  
    }  
  
    System.out.println("\nEven: ");
```
